

Innovation: Integration module for laser **MARKING & CLEANING**

We bring our laser process know-how into your equipment!

With the GEFASOFT laser process module, you benefit from GEFASOFT's long experience in the technology of laser and treatment plastic welding.

The **GEFASOFT integration module** for your project- and customer-specific solution:

- HMI (interface on customer equipment - optional)
- Foot console adaptable to your transport system
- Including integrated laser shutter (**Laser Class 1**)

LTM25	
Laser λ	1030nm (further on request)
Laser Power	25 W (further on request)
Laser processing area	[LxWxH] max. 280x200x100 mm ³
Product dimensions	[LxWxH] max. 300x220x180 mm (further on request)
Workpiece Carrier	[LxW] max. 320x240 mm
Interface	<ul style="list-style-type: none"> • PROFINET • MES communication: ask for more details
Options	<ul style="list-style-type: none"> • Feasibility study @ GEFASOFT Laser Lab • Observation camera for remote maintenance or live image • Recognition of process position via camera • DMC reader for control • External suction system • Further options on request
Module Dimension	[LxWxH] approx. 370x660x815 mm (without adapted feed)
Control cabinet	[LxWxH] approx. 600x810x2000 mm (Option)

How do you benefit?

GEFASOFT can support you with design consulting for your product design, preliminary trials and test series, as well as validation of the processes and MES integration. Further GEFASOFT offers project adapted laser system concept and on request also the project responsibility.

If you are interested in new process technology or if you have any unanswered questions, just contact us!
