

METAL CUTTING MECHANIC

(m/w/d)

YOUR EVERYDAY

You will spend the practical part of your apprenticeship in the apprentice workshop.

With us, you have the opportunity to work directly on customer projects.

You will receive support from our trainers and, of course, from all colleagues.

The theoretical background will be taught at the vocational school I in Regensburg.

WHAT YOU WILL LEARN

- Distinguishing, allocating and handling materials and auxiliary materials
- Manufacture of components and assemblies and maintenance of operating equipment
- Manufacture of workpieces
- Fastening, securing and transporting
- Planning the production process
- Project and quality management
- and much more!

THAT IS YOUR PASSION?
